SUMMARY

I am a polychronic individual committed to completing tasks on time. I am a curious and fast learner, interested in full-stack development, UI/UX design, and project management. I can effectively manage risks and fulfill responsibilities.

EDUCATION

BSE(Hons) Software Engineering

The Open University of Sri Lanka

Jan 2023 - Jan 2027 (expected)

G.C.E. (A/L) Examination – Physical Science Stream

Hermann Gmeiner School, Piliyandala

2021

PROJECTS

EDWin E-tuition Platform | *Next.js, Tailwind, Express.js, Sequelize, MySQL, Zoom API* | [GitHub Link](#)

- Developed an e-tutoring platform to connect students with tutors for live interactive sessions. Designed the database schema to support user roles and functionalities.
- Integrated third-party services like Zoom API for online classes and AWS S3 for secure file storage.
- Focused on creating a seamless and user-friendly experience for both students and tutors.

SchoolIX | *Next.js, Tailwind, TypeScript, Prisma, PostgreSQL, Docker* | [GitHub Link](#)

- Built a school management system with an easy-to-use admin dashboard. The system allows administrators, teachers, and students in different roles to access features securely.
- Created a strong backend with Prisma and PostgreSQL and used Docker for smooth deployment. Designed a responsive and simple interface using Next.js and Tailwind CSS.

StockTrack | *React, Spring Boot, MySQL* | [GitHub Link](#)

- Developed an inventory management system to help users track and manage stock efficiently. Created a secure RESTful API using Spring Boot and implemented user authentication with JWT.
- Built a user-friendly interface using React for easy navigation and data visualization. Used MySQL for reliable data storage and management.

Wasteless | *Android SDK, Firebase, Google Maps API* | [GitHub Link](#)

- Developed an Android app to reduce food waste by connecting donors with those in need. Designed an easy-to-use interface for users to donate food items.
 - Integrated real-time notifications and geolocation services to make the donation process simple and efficient.
-

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Java, Python
 - **Technologies:** HTML5, CSS3, React, Next.js, Redux, TailwindCSS, Ant Design, Node.js, Express, Sprint Boot, Docker
 - **Databases:** MySQL, MongoDB, PostgreSQL, Firebase
 - **Tools:** Git, GitHub
-

COURSES

Google IT Automation with Python Specialization - Google
